EDUCATION

The University of Texas at Austin – Austin, Texas

B.S. in Mechanical Engineering; Minor: Computer Science

December 2027

- GPA: 3.78

EXPERIENCE

SpaceX (Starbase, Texas) - *Booster Integration Engineering Intern*

May 2026 – August 2026

- Responsible Engineer for 13,000+ component assembly sealing and draining Starship Booster's feedlines during Cryogenic Proof testing
- Directed \$800,000 in machined part procurement, running daily vendor calls to ensure timely, print-conforming delivery
- Ran a daily stand-up and authored a daily status email to 80+ stakeholders
- Oversaw up to 25 technicians during subassembly build and vehicle integration
- Saved over 1100 production hours per vehicle through design rate improvements

Longhorn Racing Electric FSAE (Austin, Texas) - *Dynamics Engineer*

August 2023 – Present

- Designed rear wheel hub assembly and validated the hub with Ansys FEA
- Designed brake rotors and mounts for maximal air clearing and validated rotor structure/temperature tolerance
- Lectured 20 new and returning members, covering tension, compression, and bending fundamentals for structural design
- Simulated dynamic load cases in SKF SimPro Quick to select rear wheel bearings optimized for fatigue life and load capacity
- Designed a discrete adjustment attachment on suspension to adjust ride height without using rod-ends
- Manufactured a carbon fiber push rod and swept control arm assembly

SpaceX (Starbase, Texas) - *Structures Build Engineering Intern*

January 2025 – August 2025

- Designed the build CONOPS, fixturing tooling, lift tooling, lift rigging plan, and integration plan for a welded propulsion manifold on the V3 Starship
- Designed a tool improving work access and integration for aft flap torque frames on the Starship
- Owned 5 retrofitted flight parts through modeling as-built CAD assemblies to manufacture off-nominal parts on assembly
- Supported over 5000 hours of technician labor, resolving issues on the floor and managing up to 16 technicians at once

SiDi LAB, UT Austin (Austin, Texas) - *Undergraduate Robotics Researcher*

January 2024 – April 2024

- Integrated an infrared motion-capture camera system with a robotic arm and driver software using Python and the NatNet SDK, enabling real-time position tracking for swarm manufacturing research

Housing Scout (Austin, Texas) - *Real Estate Agent*

April 2024 – April 2026

- Licensed Texas agent specializing in leasing, matching students to suitable housing accommodations near the UT campus

Community Involvements

Neighborhood Longhorns (Austin, Texas) – *Math Tutor*

August 2024 – Present

- Tutored four 6th-grade students weekly for an hour in math
- Contributed to a 23.7% increase in students' STAAR math testing results between the 2025 and 2026 school years

Texas Wranglers (Austin, Texas) – *Alumni Liaison*

September 2023 – Present

- Coordinate events with alumni and support backend development/outreach for the organization's alumni database
- Appointed by the Vice President of the organization to serve anonymously on the Texas Wranglers Disciplinary Board
- Assisted disabled veterans at an Easterseals gym for 100+ hours by cleaning equipment and helping gymgoers access machines
- 50+ hours of caretaking with On the Moov Student Accessibility Initiative helping care for a disabled UT Austin student

ADDITIONAL

Honors: Glenn and Nancy Gilkey Endowed Scholarship in Mechanical Engineering Recipient, Selected for Tau Beta Pi Engineering Honors Fraternity, Eagle Scout with Bronze Palms

Computer Skills: SOLIDWORKS CAD, SOLIDWORKS CAM, Python, Microsoft Office, Fusion 360, SKF SimPro Quick, MATLAB

Certifications: Machine Shop, 3D Printing, Laser Cutting

Interests: Tennis, endurance running, college football, alto saxophone
